Summary

Passionate Flutter Developer skilled in building scalable applications integrated with AI agents and real-time features . Experienced in mobile development, backend integration, and software design following clean architecture principles.

Projects

UniVerse

AI-Powered Smart University Assistant

Sep 2025 - Jan 2026

- Engineered a scalable mobile application using Flutter and GetX, strictly following Clean Architecture principles to separate Presentation, Domain, and Data layers.
- Developed a Hybrid AI System using n8n workflows and Google Gemini API to generate personalized academic schedules based on complex logic (GPA, Prerequisites) and handle natural language negotiation with students.
- Implemented Real-Time Tracking features for university buses using WebSockets (Socket.IO) and OpenStreetMap, allowing live location streaming between drivers and students.
- Integrated Firebase Cloud Messaging (FCM) for push notifications and managed secure authentication flows using JWT with a NestJS backend.

Lumi Rewards

B2B loyalty rewards mobile application introducing a new rewards concept to the Syrian market

Sep 2025 - Oct 2025

- Led development of an innovative B2B loyalty rewards app introducing a new concept to the Syrian market.
- Built the mobile app using Flutter and GetX with QR code scanning via `mobile_scanner` for real-time point management.
- Collaborated with backend developers to ensure secure and scalable API integration.

Skills

Environment & Tools

Flutter SDK, Dart, GetX, Laravel, PHP, RESTful APIs, MySQL, Firebase, n8n (Complex Workflow Automation), Google Gemini API, WebSockets (Socket.IO), Clean Architecture, OpenStreetMap .

Development Tools

Visual Studio Code, Android Studio, Git, GitHub, GitLab, Postman, Firebase Console, Swagger, Figma

Education

Yarmouk Private University

Software Engineering

2020 - 2026

Experience

Freelance

Flutter & Full-Stack Developer

Remote

2024 - present

Developed full-stack mobile solutions using Flutter, Laravel, and MySQL.

Collaborated with teams under Agile methodology for efficient project delivery.

Ensured high-quality code through testing and modular architecture design .
